

AD Scientific Index 2024

Rankings for Scientist

More Than a Ranking

World Scientists Rankings 2024

The international independent ranking organisation AD Scientific Index is **more than an ordinary "Ranking"**. The "AD Scientific Index" analyses the academic work of scientists using the H-index, i10 index and number of citations, and provides results that can be used to evaluate the productivity and efficiency of individuals and institutions. In addition to ranking according to "total H-index" for individuals and institutions, you can also see the ranking and analyses according to "[last 6 years H-index](#)", "[total i10 Productivity index](#)", "[last 6 years i10 Productivity index](#)", "[total citations](#)" and "[last 6 years citations](#)" only in "AD Scientific Index". See also: [Subject Rankings](#), [University Subject Rankings](#) and [Universities Rankings 2024 \(Sort by: Last 6 years H Index\)](#). [Click](#) here for individual or institutional registration.
