### MOODLE-LMS (Learning Management System)

Moodle Learning Management System is designed to help students and faculties. Its many tools can be used to provide students with course documents, foster communication among class members and engage students in active learning outside of the classroom. In the contemporary pandemic ridden world, the traditional means of imparting knowledge in institutes of higher education have also been impacted to a considerable extent. In this context, it has become imperative to explore other learning mechanisms, one of which is Virtual Learning Approach. In this scenario, several learning management systems have evolved. Using Moodle, trainers can create and disseminate e- content in four quadrant approaches to their students in a flexible manner. The features of Moodle are personalized dashboard creation, easy to use interface, collaborative tools, automatic alerts and notifications, customized role creation, etc.
